

## **PRESS RELEASE**

### **THE DOLOMITI ENERGIA GROUP RECEIVES A BBB+ RATING WITH STABLE OUTLOOK FROM INTERNATIONAL AGENCY FITCH FOR THE FIRST TIME**

**Trento, 18 June 2025** – For the first time, the international rating agency, Fitch has upgraded the Dolomiti Energia Group long-term credit rating to BBB+, with stable outlook. This rating expresses the strength and quality of the Group's credit rating and reflects, according to the agency, the solid positioning of the Dolomiti Energia Group in Italy as one of the main operators in the energy sector with a wide range of activities, a presence spanning the entire energy production chain from production to sales, and which places significant focus on generation from renewable sources. Despite the acceleration in investments envisaged by the new Business Plan, its adoption of sound financial metrics made it possible to obtain a stable outlook from the rating agency.

**Stefano Granella, Chief Executive Officer and General Manager of the Dolomiti Energia Group said** *"we welcome the opinion of the Fitch rating agency with great satisfaction. For a Group like ours, this represents an important milestone and a key step in the implementation of the strategic plan. This BBB+ rating confirms the Group's financial solidity, represents important recognition of the industrial strategy we have undertaken and reinforces our ability to achieve the targets we have set. This result will also allow us to expand our opportunities to access the capital market under better conditions, thus supporting our path of growth and sustainable transition."*
