

PRESS RELEASE

Novareti, a company controlled by Dolomiti Energia Holding SpA and subject to its management and coordination, is entrusted with the management of the natural gas distribution service in the Trento area

Trento, 13 January 2026 – The Provincial Agency for Tenders and Contracts (APAC) of the Autonomous Province of Trento has officially awarded Novareti SpA, a company controlled by Dolomiti Energia Holding SpA and subject to its management and coordination, the tender for the management of the natural gas distribution service for the Province of Trento Single Area, for the next 12 years.

The assignment of the territorial area, which includes 167 Municipalities (166 in the province of Trento and 1 in the province of Brescia), will enable the Company to consolidate its historical presence in the Trentino region, ensuring continuity in the management of the service in a key area and, above all, to launch a major investment plan for the development of the network in areas currently without a methane gas supply, as identified in the tender.

'The outcome of the tender', explains **the Chief Executive Officer of Dolomiti Energia Holding, Stefano Granella**, 'represents a further step forward, in line with the strategic objectives of our 2030 Plan. This result will allow us to ensure continuity of our current management, thus bolstering a tested and effective operating model. At the same time, this milestone both consolidates and expands Novareti's presence in the area, extending the experience we have accrued to the management of other Municipalities and confirming our steadfast and structured commitment to serving local communities, which will benefit from a major investment plan. The result achieved also bears witness to the professionalism and skills of all those who work within the Group – a fundamental asset that we will continue to enhance and develop'.
